Website: www.sunvote.com.cn

Version V1.0 Date: 2016-09-05

- **Light for key press guidance:** when start vote, the corresponding keys will be lighten for guidance. For example, will lighten when start vote with YES/NO.

- **Keypad language, Vibration, and LCD background:** controlled by the base station. It can be set via "SunVote Keypad Features Tool".

Keypad Match

- New keypad should match to the specific base station before use to avoid it being reused and added randomly.
- The matched keypads and base station can be identified automatically when used as a whole set without matching them again.

Steps to do match:

(If you are end-user, it is set by default from factory).

Step 1: Open SunVote ARS Tool Kit , connect base station. Click , then click ready to do match.

Step 2: On the keypad, press and at the same time until LCD shows matching.

Step 3: LCD will show "Matched" when success.
